Opis produktu

Jakość: OEM

The EDGE FREE case was designed specifically for the latest generation of Apple smartphones from the iPhone 17 series. The minimalist, frameless design highlights the modern design of these models while providing effective protection and full compatibility with MagSafe features.

Modern, frameless design

The frameless design highlights the distinctive lines and aesthetics of the new iPhone 17, leaving its design in the spotlight. At the same time, the case still protects the back of the device and the camera module without increasing its size.

Functional, flip-up ring

The built-in ring makes it easier to grip and can be used as a stand for watching movies, making video calls, or working with the device. It's a practical solution that works well at home, on the go, and in the office.

Full MagSafe Compatibility

The case features a precisely fitted magnet that works with MagSafe chargers and accessories. The frameless design does not interfere with the magnetic field, ensuring a strong and stable hold of the phone on the charger.

Light, durable, and resistant

High-quality plastic provides resistance to everyday scratches and damage, while remaining lightweight and comfortable to use.
