Kod EAN	6942007638982

Opis produktu

Fast charging USB-C / Lightning - USB-C cable with car cigarette lighter from Hoco. Enables fast charging with up to 60 W and data transfer. Supports Power Delivery and Quick Charge 3.0 protocols.

Charge even large devices quickly! The cable is compatible with the Power Delivery and Quick Charge 3.0 protocols, suitable for powering many different devices with a power requirement of up to 60 W. Fast charging means that you will quickly charge the battery of your smartphone (or other device) to full capacity.

Safety first: the temperature of the cable connectors is maintained at a constant level, so you don't have to worry about overheating and damaging the battery - even when you use the device while charging.

Thanks to compatibility with **USB-C and Lightning interfaces, it allows you to heat the heating element** to light a cigarette from various sources, such as smartphones, mains chargers or power banks. The lack of open flame makes the device safe and convenient to use, making it an ideal solution in every situation.

A long 1.2 m cable ensures comfortable use of the smartphone while charging. Made of high-quality aluminum alloy and braided wire, the cable is resistant to everyday use and ensures durability for many years.

Specification:

Power:

- USB-C: 60 W
- Lightning: 27 W

Current intensity: 20 V / 3 A

Connectors: USB-C / Lightning - USB-C / car lighter

Length: 1.2 m

Weight: 43 g

Fast charging technology support: Power Delivery, Quick Charge 3.0
